

EW-2520 Double line sequence detector

Features

1. Designed for double-row cables like ATX power cords
2. It can detect the two sides of the double-row harness from the left and right at the same time
3. Suitable for all double-row wire harnesses, stable and versatile
4. Strong anti-interference ability, there are characters, color circles, inaccurate placement on the line, etc., which will not affect the test results

Technical data

Model	EW-2520
Camera parameters	1280*1024;60fps;COMS
Lens parameters	Megapixel;75mm F1.4
Viewable range	1-58mm
Detection time	Within 0.2S
Power	35W
