

EW-5030

Semi-Automatic Waterproof Plug Stripping Plus Crimping Terminal Machine

Features

1. Stripping length can be adjusted by data. Wear waterproof plug depth, adjusted according to the data of the glue position between the stripping and the waterproof plug.
2. The depth of the end rubber can also be adjusted according to the position of the top line.
3. Machine is driven by high-efficiency servo motor, high-speed stamping and pressure stability.
4. The peeling slide is driven by a screw rod to ensure accurate stripping length.
5. The cutting mechanism is driven by a motor and screw, and the tangent data can be adjusted.
6. Waterproof plug feeding mechanism, easy to replace, to meet the needs of customers with more products and more types

Technical data

Model	EW-5030
Stripping length	0mm-10.0mm
Applicable wire Diameter	0.2-2.5mm ²
Air pressure	0.5~0.7mpa
Cut precision	±0.02mm
Crimping capacity	3T
Stroke	30mm
productivity	1000-1200 pcs/H
Waterproof plug size	≤φ10×10
Power Supply	220V/110V/50/60HZ
Dimension	850*880*1300MM
Total weight	300KG
CFM	Optional
