

EW-5580 Pre insulated terminal machine

Feature

- Sharing OTUTs of the same model does not require adjustment, greatly saving model switching time and increasing production flexibility, allowing you to quickly respond to diverse production needs.

- Adopting a 7-inch high-definition color operation screen, the interface is simple and easy to understand, with a visual parameter setting and debugging interface, allowing operators to quickly get started without complex training.

Technical data

Model	EW-5580
Applicable core wire diameter	0.5-6mm
Processing capacity	About 3 seconds per cycle(The speed varies depending on the product)
Machining length	The outer skin length is about 40mm
Stripping length	5-12mm
Knife value error	Precision lead screw 0.01
Crimping capacity	2T
Detecting device	Rotation in place detection, missing terminal detection
Auxiliary device	Rotating peeling
Machine Dimensions	552*530*491mm
Machine Weight	55kg
