

## EW-06F Coaxial Cable Stripping Machine

---

### Features

---

1. Suitable for different types of semi-flexible and flexible coaxial wires, charging cables, medical wires' processing in communication and medical industry.
2. Smooth stripping edge and no harm to the conductor.
3. The stripping stability and blades' lifetime are highly improved owing to the rotation head blade and four pieces of exquisitely designed blades. (Blades are made of imported tungsten steel and titanium alloy coating, which is sharp and durable.)
4. Servo-motor, precision ball screw and multi-point movement control system are adopted to realize the stable and efficient working performance.
5. Human-computer interface, which is easy to operate and understand.
6. With maximum 9 layers stripping capacity and 99 memory settings function.

### Technical data

---

Model	EW-06F
Max. stripping length	0-48 mm
Diameter increments	0.01 mm
Capacity	750 - 1150 pcs./h (depending on wire material)
Wire diameter	0.8 - 7 mm
Length accuracy	± (0.002 * L) mm
Max. stripping layer	9 layers
Display	Touch Screen
Dimension	600*185*280mm
Weight	27 Kg
