

## EW-3125 Wire cutting&stripping Machine 120mm<sup>2</sup>

---

### Features

---

- 1.New mode cable processing equipment that controlled by micro computer, especially for processing the high voltage power cable in the industries of new energy motor, power charging station, electronic control, BMC and etc. which essentially solves the problem in processing the big power cable;
- 2.Automatic wire cutting, two ends stripping, multi-layers stripping at the same time;
- 3.The cross section of the cable is processed tidily by unique rotary tool; cut fast to the shielding net;
- 4.Industrial level control chip and high precise servo driving to ensure its high speed and stable running;
- 5.PLC control system , touching screen operating;
- 6.Automatic wire diameter adjusting, different power cable doesn't need to change the cutting tools;
- 7.Belt style driving without any pressing marks

### Technical data

---

Model	EW-3125
Stripping range	6-120 mm <sup>2</sup> (other size can be customized)
Max stripping diameter	6-24mm
Stripping Length	1-260mm(wire head), 1-120mm(wire end)
Cutting length	10-100000mm
Capacity	700-900 pcs/h (it depends on the length of the wire)
Power	220V, 50HZ
Weight	460kg
Dimension	1200 X 800 X 1360mm
Stripping layer	6 layers
Stored programs	0-99kinds of processing data
Tool materials	Imported high speed steel
Press wheel setting	Motor drive, digital control of crimping force
Drive	8 wheels independently servo driven
