

## EW-801

### Full Automatic Terminal Machine Press Machine (Double head)

## Features

This is a fully automatic 2-ends wire cutting stripping and crimping machine for AWG28~AWG12. The highly flexible and electronically controlled benchtop unit accepts most universal or mini-style applicators for crimping both side-feed and rear-feed open barrel terminals. You can also save your settings in a program file number, so that you can call it out easily next time.

## Technical data

|                       |                                                                                          |
