

EW-1920 Heat Shrink Tube Insertion Machine

Features

- Automatic PLC touch screen control circuit, simple and convenient operation, good working stability
- Automatic feeding, cutting and heat shrinking of the entire roll of heat shrinkable tubing, eliminating the tedious process of manual discharging;
- The efficiency is about 1500 heat shrinkable tubes per hour (depending on the production capacity), which saves time and effort and improves work efficiency.
- Customized according to heat shrink tube and product.

Technical data

Model	EW-1920
Tube outer diameter	1-5.5mm(can be customized)
Tube length	5-25mm(can be customized)
Power	1000W
Voltage	110, 220 V (50 - 60 Hz)
Positioning accuracy	±0.2mm
Cutting accuracy	±0.3mm
Weight	200 kg
Dimension	700 * 800 *1200 mm
Yield rate	99%(
Productivity	700-1200pcs/hour(according to tube)
